THE Diamond Garment Cutting School

Which has been in progress in the G. A. R. hall are having splendid success. This unprecedented patronage in this movement is due to the superior excellence of this system and the great need existing among the ladies for higher education in this line. That the ladies everywhere need higher education in this useful art is apparent to all. The making of the costumes for the family is a source of more annoyance and more trouble than all other duties ladies have, and as this movement simplifies one of their most arduous duties, it may properly be classed as a benefactor to womankind. We boast of a superior progress and enlightenment of the nineteenth century and yet our women can not make their best costumes. In this line of practical education we are not up to the standard of the advanced times. Now that the opportunity is presented it behooves all to appreciate the magnitude of this movement. Now all those wishing to take instruction in the Garment Cutting School must come in on or before the 10th of August.

Yours Resp'y,
Diamond Garment Cutting School.

NATURE'S DANGER SIGNALS

Do your eyes blur at times? Do they hurt after reading? Are there frequent headaches? Are the muscles around the eyes drawing wrinkles and crow's feet? They're Nature's danger signals.

Only when sight is gone is the terrible danger realized.

It costs so little to help the eyes, if done in time. We can give the early help—later we have to refer the work to oculists.

We examine the eyes in the most intelligent and careful manner without charge. If glasses are needed we can supply the correct lenses mounted in any manner desired.
